

metalraxstorage

Personnel & Premises

Product Information

To compliment our range of manufactured storage and handling products, **metalraxstorage** can offer you an extensive range of Premises & Personnel equipment.

We recognise that many of our health clients are looking for a 'turn-key' approach from suppliers. We are able to meet your expectations with our Essentially Storage & Workplace Equipment catalogue. With over 360 pages of high quality products at value for money prices, we are confident that, whatever you need, the Essentially Storage & Workplace Equipment catalogue will have something to do the job.

An extensive range of standard **manual handling equipment** is complimented by a bespoke service offering a design and production capability to make lifting and moving products easy. If the standard product range does not 'fit the bill', we can conduct an audit to customise a solution; so 'off the peg' or 'made to measure'; the choice is yours.

For high bay shelving, we recommend a set of **ladders, steps** or a **Voyager people lifter** from our range of static and mobile access equipment. With safety at work being a priority, every storage facility or department should have the means to enable operatives to work effectively and safely at height.

Personal effects and valuable or sensitive material can be securely kept inside one of the many **locker** or **cupboard** options. Doors can be colour co-ordinated to enhance your workspace or as an aid to content identification. Lockers and cupboards are coated in 'Germ Guard' anti-bacterial paint which is designed to help improve the hygiene of frequently-used units.

You can choose from a range of **tables and chairs** to **protective clothing and footwear**, everything to enable your operatives to work efficiently and safely. Our range of **smoking shelters** will offer employees protection from the weather when they take their break.

Externally, we can supply **signs and barriers, waste bins and protective containers** and enclosures for hazardous material. We even have **marking systems** and **traffic calming** equipment for the car park.

Within this one publication you can source everything you need to keep your hospital running smoothly, efficiently and effectively. For your free copy, fill in the details on our catalogue request form and we will post one to you without delay.
